

Management Change at Nordic Air Filtration

Nakskov, February 2010

To the Customers, Suppliers and Partners of Nordic Air Filtration

We take this opportunity to inform you of changes in organisation at Nordic Air Filtration. We are confident that we will continue to improve our service to you, and further our mutual cooperation, through these changes.

Nordic Air Filtration is part of the global Midwesco Filter Resources group. The Group will engage Jørgen Poulsen, Managing Director of Nordic Air Filtration, leveraging his considerable talents in the development and promotion of new products on an international scale. This change is part of an ongoing initiative to drive Nordic Air Filtration, and the Midwesco Filter Resources group, to be more innovative and competitive in the future.

In this context, Jørgen Poulsen has decided to leave the organization, in order to become an independent consultant. As an independent consultant, Jørgen will start to work across the entire Midwesco Filter Resources group, and at the same time will be able to provide consultancy services to new customers in new markets.

André Radley Grundahl is appointed Managing Director of Nordic Air Filtration. For the past year as Director of Operations, Andre has driven much positive change in the operation during a difficult economic time. Through his strong customer orientation and focus, Nordic will continue to improve its products, quality, and service.

At Nordic Air Filtration, our goal is the timely supply of innovative, high quality products. These organisation changes contribute to our commitment to supply products and services that meet and exceed our customers' expectations. We look forward our continued partnership!
